What you receive

01

A finished product

A website, store or internal service taken from task clarification to launch and post-migration verification.

02

Less manual work

CRM, payment, delivery, inventory and billing integrations that move data automatically.

03

Custom functionality

Accounts, booking, roles, catalogues, filters, imports and queues built around your workflow.

04

Clear data

APIs, internal panels, audit services and analytics dashboards in one controlled interface.

05

Stable environment

Hosting, domain, SSL, web server, mail, background jobs and deployment configuration.

06

Legacy support

Diagnostics, recovery, safe migrations and new features without an automatic full rewrite.

02

HANDS-ON EXPERIENCE

Problems already solved

01

Online sales

Catalogues, orders, payments, delivery and manager workflows as one controlled process.

02

Data exchange

REST APIs connecting websites, applications, CRM, billing, LDAP and logistics.

03

Internal services

Audit and analytics dashboards replacing manual checks and spreadsheet reports.

04

Legacy and recovery

Critical fixes, malware cleanup and controlled migrations without stopping business.

05

Background jobs

Queues, email, push notifications, synchronisation and deliverability control.

06

Large datasets

Generation from 5,000+ hierarchical records per run without overloading the server.

My work

YII2 ADVANCED / E-COMMERCE

01

Premabrand

Online store with customer account, REST API, queues and Nova Poshta, WayForPay and KeyCRM integrations.

From \$3,000 · from 3 months

5,000+ records per run

All 19 projects with screenshots: latul.website/en/cooperation/

05

NO FINE PRINT

Terms and process

01

Cooperation

Under a contract or through a freelance platform.

02

Payment

Ukrainian sole-proprietor account or Payoneer.

03

Prepayment

Not required - payment after the completed work is fully checked.

FROM START TO LAUNCH

01

Development takes place on my servers.

02

After approval, I migrate the project to your hosting or server free of charge.

03

I verify the project again in your production environment.

04

Work performed exclusively on your server is billed hourly.

05

If needed, I can host the project myself, configure the environment and provide technical support, or prepare it for third-party hosting.

\$25/hour
